- **Data Visualization / Other:** Power BI

ADDITIONAL INFORMATION

- Immediate availability
- Registered in the Youth Guarantee Scheme
- Cambridge B1 English level

ADDITIONAL EXPERIENCE

- [Volunteer Web Designer — ADCA Association | 2025](#)

PROFESSIONAL PROFILE

Graduate in Multiplatform Application Development (DAM) with hands-on experience in IT support, application development, and process automation. I have worked with Java/Spring Boot, Power Apps, SharePoint, C#, Kotlin/Firebase, Python, and SQL. I am seeking a junior position in development, QA Automation, or Power Platform, where I can contribute fast learning ability, strong documentation skills, and a continuous improvement mindset.

EDUCATION

Bilingual Higher Vocational Diploma in Multiplatform Application Development (DAM) | 2023-2025

- Final Project: WEB-DE-PROTOCOLOS-HSJD

High School Diploma in Technological Sciences

- I.E.S. Juan Ciudad Duarte | Sep 2019 – Jun 2021

SALESFORCE: Developing APPs in APEX 2025

- 60 h Cloud Coachers (Visualforce)

PROFESSIONAL EXPERIENCE

IT Department Intern – Hospital San Juan de Dios | Mar 2025 – Jun 2025

- Provided user support through diagnosis, prioritization, and resolution of hardware and software incidents, following them through to closure.
- Managed hardware and software inventory, documented procedures, and updated internal management tools, improving availability and response times.

Customer Support Agent – Konecta | 2023

- Handled and managed customer queries by phone and email, resolving incidents and routing requests to the appropriate team through to closure.
- Documented cases in the CRM, improving case tracking and incident traceability.

PROJECTS

knowledge-ops-hub — Spring Boot, PostgreSQL, n8n, Ollama

- Developed a local solution to turn PDFs into a searchable knowledge base using RAG, with citation-based answers and page-level traceability.
- Implemented a backend with JWT, semantic indexing, and automated document ingestion using Spring Boot, Postgres/pgvector, and n8n.

Hospital Protocol Management App — Power Apps, SharePoint

- Internal application designed to centralize hospital protocols with role/service-based access, reading traceability, and version control.
- Focused on improving internal processes, document organization, and multi-user experience.

Selenium end-to-end — Java, Selenium, JUnit

- Automated end-to-end web flows including login, navigation, forms, and validations through repeatable tests.
- Page Object-based structure, use of assertions, and focus on test stability and maintainability.
